T. ANJUSHA

INTRODUCTION

- The emergence of technology in today's world has led to massive Data Generation.
- Data Analytics refers to all the tools and activities involved in processing data to develop valuable insights and interpretations.
- Data Visualization deals with picturing the information to develop trends and conclusions.

PROJECT STATEMENT

1. To find the top 10 industries with highest profit based on year 2021.

2. To find the top 10 and last 10 companies based on Income.

DATA COLLECTION

Table form of data

Bar chart for top 10 Industries based on Profit

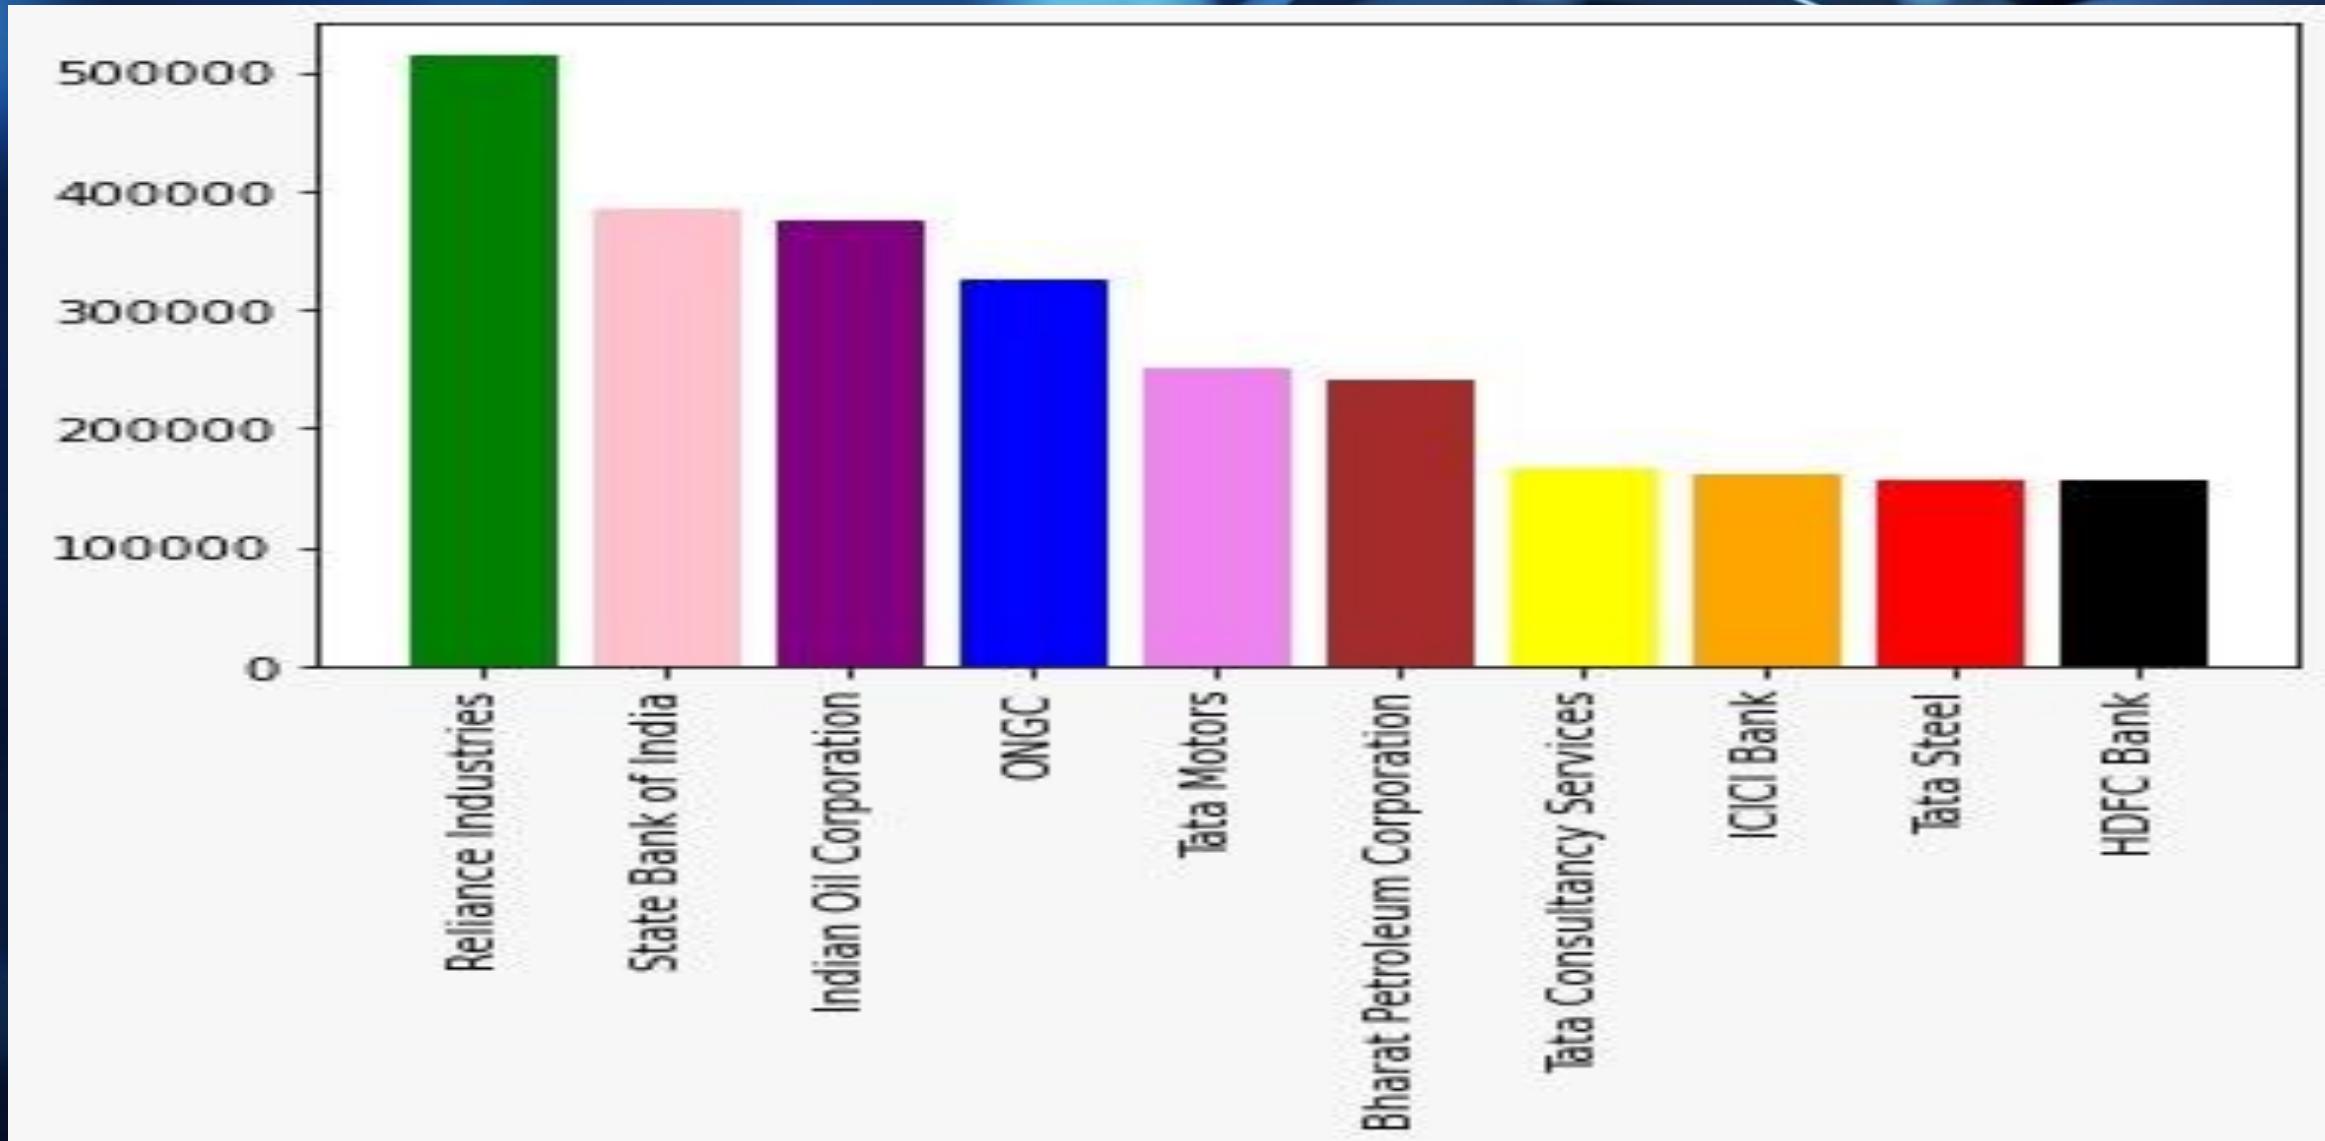

Pie chart & Box plot for top 10 Industries based on Profit

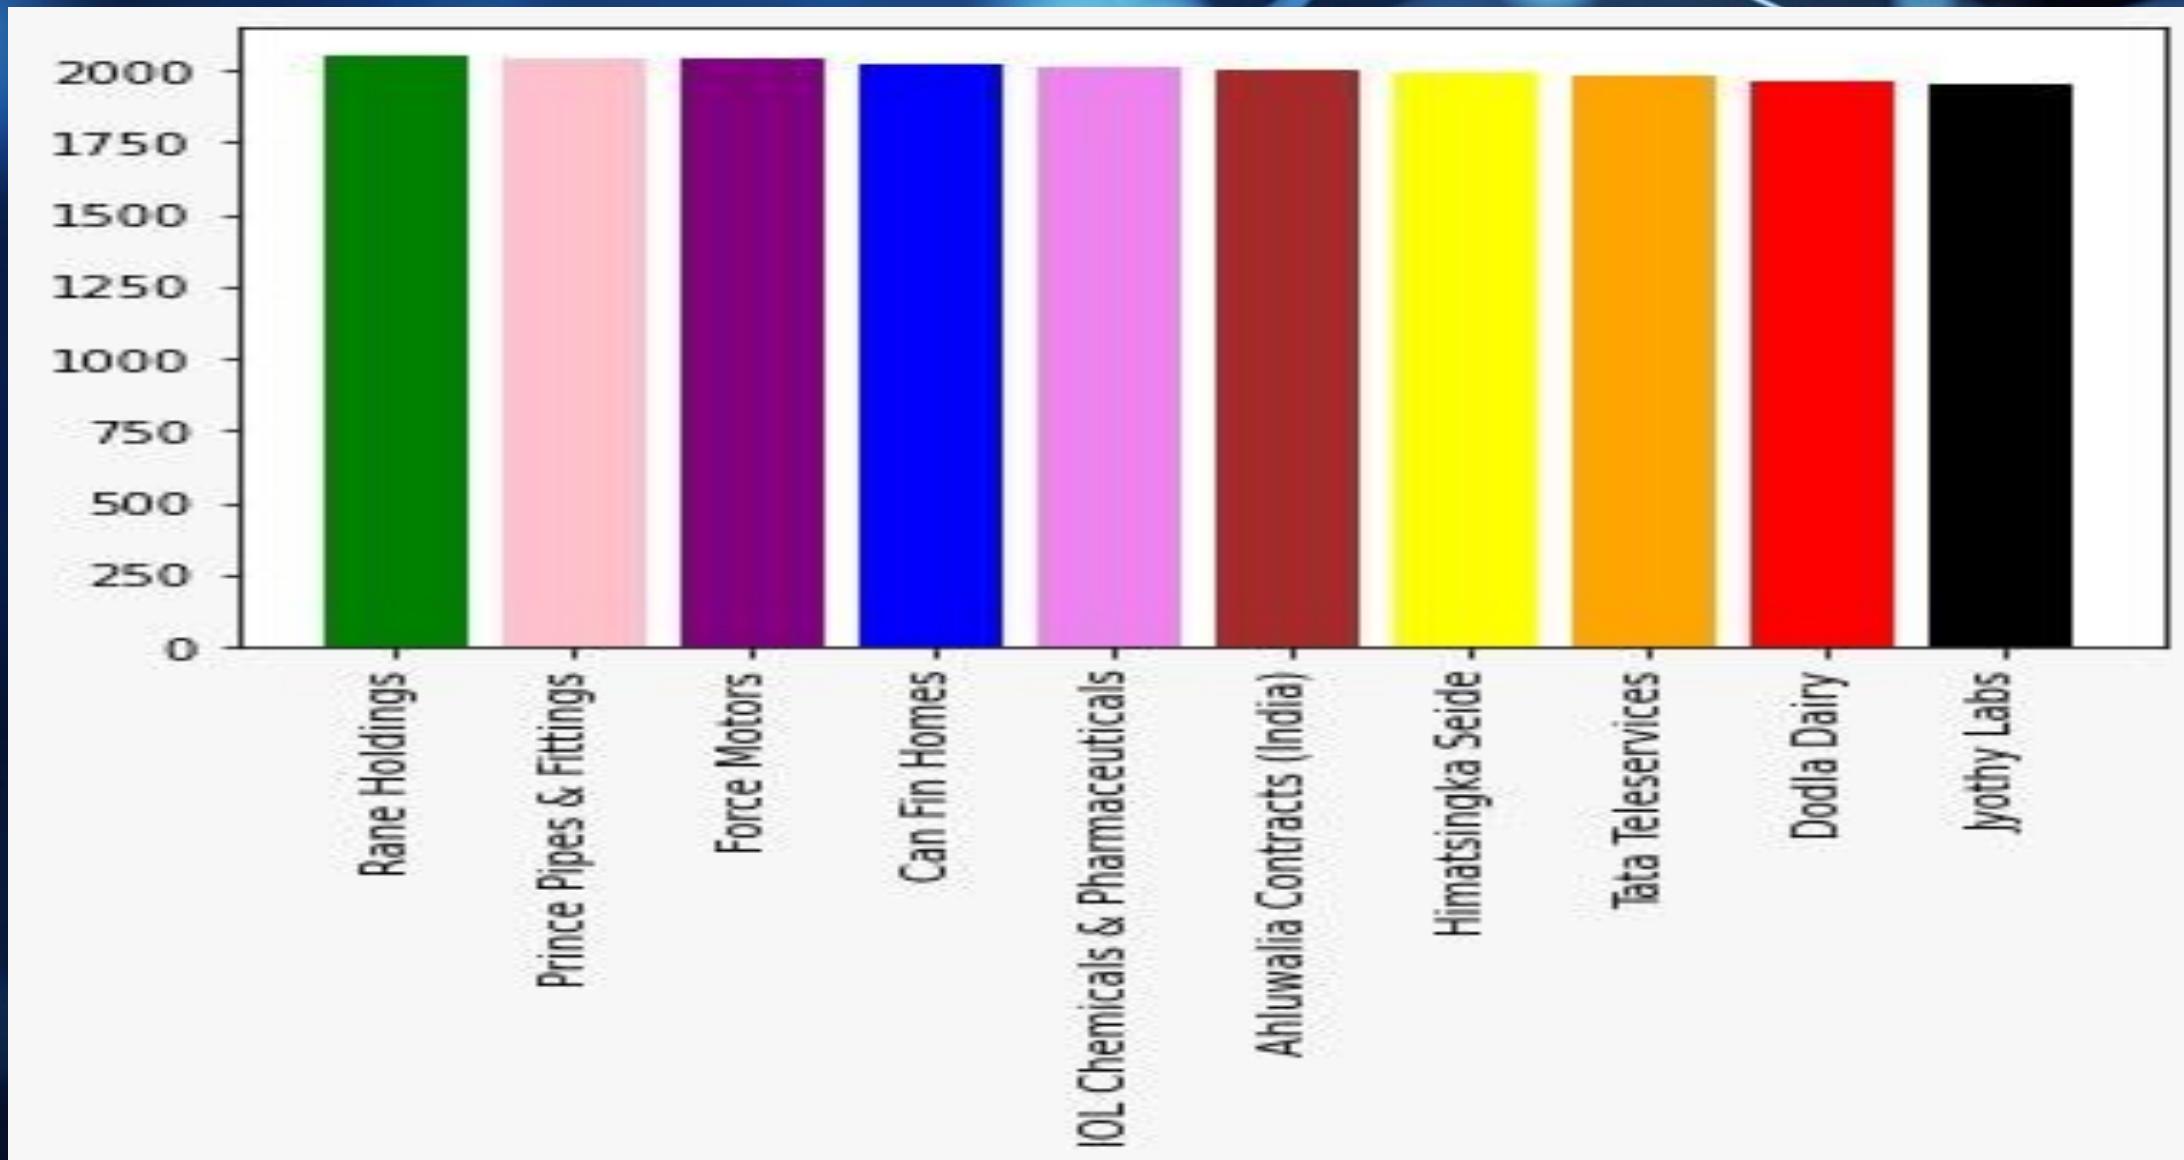

Bar chart for last 10 Industries based on Profit

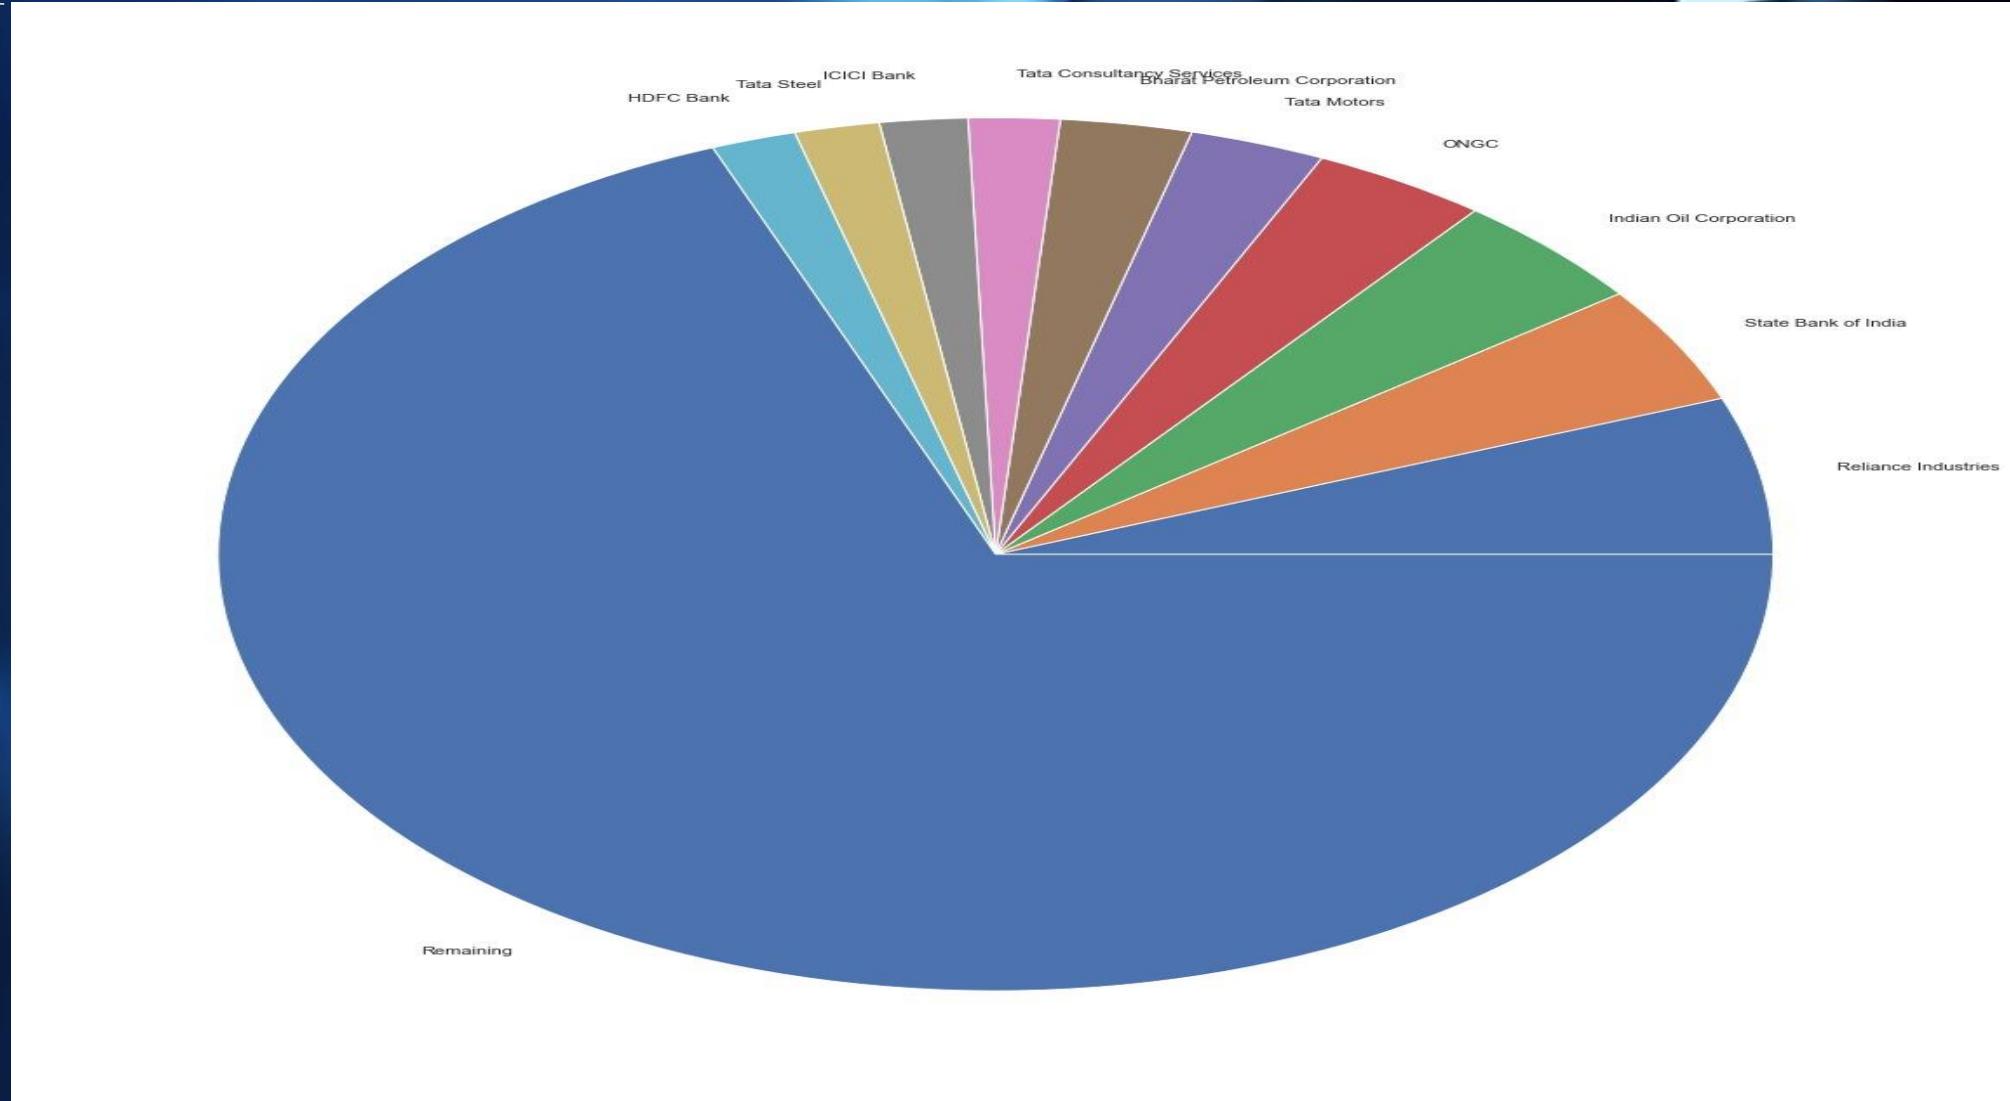

Income of top 10 companies

Income of last 10 companies

Pie chart representing all companies along with top 10 companies income

Conclusion

Using the information from Fortune 500 companies data, We found that banking sector has more profit compared to all the other industries followed by oil & gas and IT services.

Reliance industries with Rs.514217 Cr has the most income and Jyothy labs with Rs.1954 Cr has the least income among income of all 500 companies

Thank You

B. Jayalakshmi
